

Achievements

We have influenced policy to improve the state of the world through:

- New National Young Academies established in 25 additional countries
- A national mentoring program in Thailand based on recommendations in our Global State of Young Scientists (GloSYS) report
- Contributions to high-level international fora, e.g. on UN Sustainable Development Goals and open science
- Representation on national and international committees and work groups (UN, UNESCO, ICSU)
- An Africa Science Leadership Program launched in 2015
- GYA activities highlighted both in *Science* and *Nature* magazines

“ *The world will not reach the goals of the 2030 Sustainable Development Agenda without the creativity and innovative power of young scientists. I strongly support the Global Young Academy in their endeavor to mobilize young researchers from around the world and UNESCO will join forces to give them a voice.* ”

Irina Bokova, Director-General of UNESCO

“ *I am delighted to have been asked to write a few words in support of the fifth anniversary of the Global Young Academy. I am also delighted that the South African Young Academy of Science is an active participant in the GYA. We fully support the role of SAYAS and the GYA in finding and growing the young scientists of the future. It is these young committed scientists who will enable humanity to understand the interrelationship of all branches of the sciences and to give substance to the aspirations for lives of sustainable and dignified development.* ”

GNM Pandor, Minister of Science & Technology, South Africa

Support us

We rely on partners to support our activities through collaboration, grants, donations and sponsorship. We invite you to become part of our exciting work and support our plans for the future.

Ways you could help:

Studies – finance a research report that will have global reach

Professional development – subsidize courses, sponsor a workshop, offer expertise

Annual conference – sponsor the meeting

Travel grants – help members to attend meetings

Networking – foster exchange between young scientists and with senior science organizations

National Young Academies – sponsor or co-organize a global or regional meeting, fund an exchange program

Administration – maintain our momentum with a core grant or regular donation

Please get in touch to find out more about what we can do together.
