

New Perspectives on Open Science

Conveners : Koen Vermeir (CNRS & Global Young Academy) & Moritz Riede (Oxford & Global Young Academy)

Date: Tuesday 20 March 2018, 14h00 – 18h30

Location: Maison Française d'Oxford (MFO), 2 – 10 Norham Road, Oxford OX2 6SE

Abstract:

Open Science is currently undergoing major changes. From an activist movement promoting the open sharing of scientific results it has transformed into the dominant framework in European science policy. On the way, implementation is increasingly recognized to require diverse practices, institutions and infrastructures, and Open Science has become more complex and ambiguous. In this workshop, we will discuss the new identities of Open Science and the new challenges the movement is facing. We will evaluate whether old strategies and ideas are still effective and relevant and explore areas of Open Science that have largely remained off the radar. To close the workshop, we will put the spotlight on one of these forgotten pillars of Open Science, the fair access to research software, in particular in low and middle income countries, and a new Global Young Academy report on this subject will be launched.

Program:

14h00: Opening: Frederic Thibault-Starzyk (MFO), Koen Vermeir (CNRS / Global Young Academy) & Moritz Riede (University of Oxford / Global Young Academy)

14h15: Peter Murray-Rust (University of Cambridge). Keynote lecture: “Young scientists in an age of Knowledge Capitalism”

15h00: Sally Shuttleworth (University of Oxford): “Citizen Science, Past and Present”

15h20: French Open Science representative

15h40: Tea & Coffee

16h00: Pip Willcox (Oxford University): “Scientia Aperta: enabling humanities and the open turn”

16h20: Sabina Leonelli (Exeter University) “Implementing Open Science: Incentives and rewards”

16h40: Panel discussion: Open Science at a crossroads? Panellists: Srinjoy Mitra (University of Edinburgh); Martin Dominik (University of St. Andrews); Sabina Leonelli (University of Exeter); Peter Murry-Rust (University of Cambridge); Pip Willcox (University of Oxford)

18h00: Global Access to Research Software (GARS) of the Global Young Academy:

- GARS Panel: Abdullah Shams Bin Tariq (University of Rajshahi, live stream); Louise Bezuidenhout (University of Oxford); Koen Vermeir (CNRS)
- GARS launch: Moritz Riede (University of Oxford)

18h30: Walking dinner and time for discussions

Attendance is free, but a quick registration would be appreciated via:
